EnergyWeek

Excess heat – The cleanest energy?

Wednesday 19 March
14:30 - 16:00
Meeting Hall

It has been said that the cleanest energy is the unused energy… But what about excess heat?

Excess heat is continuously generated in society and with the green transition in industry it will be even more. Often, this involves large amounts of energy, but at a rather low temperature. Therefore, solutions are needed to utilize the available energy. During this seminar you will hear about different solutions from different perspectives, all with the aim of utilizing excess heat more efficiently.

Excess heat – The cleanest energy?

Catarina Still
Project Manager, Bothnia Green Energy
Jakobstad region Development Company Concordia

Introduction and welcoming words from the moderator

Catarina Still
Project Manager, Bothnia Green Energy
Jakobstad region Development Company Concordia

Capitalizing on waste heat using long duration thermal storage

Denise Conway
CEO
Heliostorage

Excess Heat Utilization, Opportunities and Challenges

Timo Laakso
Vice President
Elomatic

Industrial Synergy: Excess Heat into Valuable Energy at AIP: Presentation of an energy industry and pulp production model, where energy and value circulate.

Åsa Björkman
Project Manager, Alholmen Industrial Park/AIP

Power from uniquely low temperatures – possible and is it viable?

Lars Birging
CEO
Zigrid

Panel discussion

Denise Conway
CEO
Heliostorage

Timo Laakso
Vice President
Elomatic

Åsa Björkman
Project Manager, Alholmen Industrial Park/AIP

Lars Birging
CEO
Zigrid

Concluding words

Catarina Still
Project Manager, Bothnia Green Energy
Jakobstad region Development Company Concordia
