

Sustainable synergies: German-Finnish co-operation in the energy sector

Wednesday 19 March
13:00 - 14:30
Music Hall

Germany and Finland already have long and successful economic relations. However, the energy sector offers great potential for expanding these relations. The decarbonization of industry is ongoing in both countries. This offers the opportunity to learn from each other and tackle the challenge together. In the seminar, we want to work out the respective priorities in Finland and Germany and identify opportunities for companies to participate.

Programm

13:00 - 13:10

Welcome & Introduction

Jan Feller

Panel Discussion

Panel Discussion: The Future of Energy Cooperation Between Germany and Finland

The panel will explore current cooperation in the energy sector between Germany and Finland, highlighting ongoing projects and strategic partnerships. The discussion will focus on the future potential of this collaboration, identifying the next steps needed to accelerate joint efforts in the energy sector. A special emphasis will be placed on the hydrogen market and its development, as well as the role of innovation and policy frameworks in shaping the next phase of cooperation. Industry experts will share their insights on how to unlock new opportunities and drive sustainable energy solutions forward.
